

Beautification Committee
June 3, 2021

Joey Hendrix at Hendrix Irrigation and Fencing completed his agreed upon work on both of the traffic circles this past week. The RPZs have been installed and the testing certification has been sent to the city. The sprinkler heads have been replaced and new parts to the system have been installed. It is set to water every day while the new plants become established,

Jackie Lamar will donate day lilies and several other perennial plants from her garden and will ask for a workday next week to plant them.

The sprinklers were turned on at the Tyler entrances today by a Beautification Committee member. The last sprinkler head on the John Bryant entrance appears to be lacking sufficient pressure to raise the head sufficiently to water the back shrubs against the wall. They were also weeded and trimmed by Natural State Landscaping as per their contract with SJNA.
